

Whirlaway

Things to remember!

1. Read the handbook before using.
2. Always use protective clothing and goggles.
3. Grease before first use and on a daily basis.*
(Hot water use high temperature grease)
4. To prevent excessive nozzle and rotor wear tilt cleaner to expel small stones and abrasive material during operation.
5. During operation maintain continuous motion to prevent surface damage.
6. Minimum clearance between spray nozzles and surface should be no less than (1") 25mm.
(See handbook for height adjustment instructions)
7. Do not allow rotating arm to come into contact with rigid protruding objects.
8. Do not operate on vertical or overhead surfaces.
9. Keep hands and feet away from high pressure nozzles and high speed rotating arm.
10. Check nozzle sizes are suitable for pressure washer water flow and pressure.
(Max flow = 30 lpm Max pressure 276 bar)

***Recommended** - Qualube Premium Lithium Complex Grease

Part Number: 199-2004

Part No: 793-1510
